(54) Title: **SHOWER DRAINAGE**

(57) Abstract: A pump for use with a shower base includes a pump chamber (12) having an inlet for receiving water from a shower base and an outlet (14) through which the water is pumped; such that the inlet can be connected to the shower base such that the water drains directly into the pump chamber (12) from the shower base. A wet floor former (55) for supporting a water resistant floor covering material, comprises a base having a predetermined fall, and a trap towards which the fall is directed, the trap comprising a sump which is provided on the base, a shower water inlet through which water from the floor covering material can enter the sump, and a waste water outlet, the sump acting as the pump chamber (12) when a pump is installed.
